

DILLON BARRERA

Houston, TX ♦ 409-460-9389 ♦ dillon.barrera@outlook.com ♦ linkedin.com/in/dillon-barrera

IT professional providing on-site and remote support for Windows endpoints, A/V systems, and networked printers across a multi-campus higher-education environment, independently resolving Level I and II hardware, software, and network issues. End-user support experience with Microsoft 365 applications, along with hands-on experience administering Entra ID, Intune, and Active Directory. CompTIA Security+ and (ISC)² CC certified, currently pursuing the Microsoft 365 Endpoint Administrator (MD-102) certification and a B.S. in Cybersecurity. Longtime Linux user with hands-on experience across multiple distributions, including building and maintaining minimal Arch Linux and NixOS systems from the ground up with system-level configuration tailored for usability, automation, and workflow efficiency.

Work Experience

Lone Star College, Desktop Support Technician

Sep 2025 – Present

- Provide on-site and remote support via ServiceNow across three campuses for 530+ Windows endpoints, 55+ A/V systems (including TekVox controllers), and 50+ networked printers, resolving technical issues while delivering clear, non-technical guidance to faculty, staff, and students
- Resolved an intermittent workstation connectivity issue that had generated multiple prior support tickets without resolution, isolating a faulty PC pass-through port on the user's Cisco IP phone as the root cause and restoring stable service
- Independently investigated recurring captive portal failures during a campus-wide guest Wi-Fi launch, identifying Cisco ISE as the authentication platform through page source analysis, then researching ISE documentation to develop a temporary workaround that remains in active use and presenting the Network Admin II with diagnostic findings and a suspected root cause

Freelance, IT Support Technician

Jan 2024 – Present

- Diagnosed and resolved a complex hardware failure on an EOL system, identifying a shorted power switch cable as the root cause, then migrated the system to Linux Mint, restored client data, and provided hands-on training on the new OS and productivity software
- Provided security-focused consulting including home network setup guidance, VPN deployment, and endpoint security best practices
- Advised a client on network extension solutions to provide reliable internet connectivity to a detached workspace beyond existing WiFi range

HEB, Customer Service Associate

Nov 2023 – Present

- Received 2025 HEB Customer Service Award based on written nomination from cross-departmental leadership for consistent customer service excellence

Education

B.S. Cybersecurity, SNHU

Expected Aug 2026

A.S. Information Technology, SNHU

Graduated Jan 2023

Certifications

CompTIA Security+

Issued Jul 2024

(ISC)² Certified in Cybersecurity (CC)

Issued Dec 2023

Microsoft 365 Certified: Endpoint Administrator Associate (MD-102)

Expected May 2026
